

Precautions for use

1. This product is not a means of transportation. In order to ensure safety, it must be used under the guard of a guardian.
2. This product is for children over three years old. Before use, children should be given safety education.
3. This product must have adult assembly and battery charging. When the battery is connected with the main wiring, the terminals should be red to red and black to black.
4. The driver should sit on the seat board. It is forbidden to drive on the street or in the area with motor vehicles and on the uneven ground.
5. It is not allowed to change the product structure and circuit system without authorization, and it is not allowed to disassemble batteries, chargers and other accessories at will.
6. When you stop using or placing the product, please turn off the power supply and turn all switches to the stop or off position.
7. Do not use any accessories that do not conform to the specifications of this product.
8. When charging, keep away from inflammables to prevent fire.
9. The charger and battery of this car can not be used in other products.

Daily maintenance

1. After the first correct use, the motor and steering system screws should be checked regularly (every half a month is recommended) to see if they are loose, and the hidden danger should be repaired in time.
2. Regularly check the charger's wire, plug, shell and other parts for damage. If any damage is found, stop using them and repair them before using them.
3. It is not allowed to change the structure and circuit system of the product without authorization. If the electrical equipment fails, it must be repaired by professionals.
4. It is not allowed to cancel or use the fuse inconsistent with the product.
5. The vehicle can be cleaned with soft and dry cloth, not with car wax, water or gasoline.
6. The product shall not be stored in high temperature, near fire and humid places. In snowy and rainy days, the vehicle shall be covered with articles to avoid contact with liquid, and shall be disposed by professionals.
7. The replacement of the battery must be operated by an adult. Because the battery is heavy and has compatible electrolyte inside, if there is any leakage, avoid contacting with the liquid and have a professional handle.
8. In case of accidental contact, rinse with cold water in time for only 15 minutes, and seek treatment from a doctor.
9. In areas with unstable supply voltage, it is recommended to install voltage stabilizer to protect the battery.
10. It is forbidden to use inferior wiring or metal objects to link the secondary battery, otherwise it will cause battery short circuit, damage the circuit or cause fire.
11. It is strictly forbidden to use the car in the hot sun and rain.
12. Charge the vehicle in a good and dry area and keep the battery dry.

Children electric motor

Installation instructions

Please keep this manual properly and read it carefully before use.

Installation procedure

Battery maintenance

1. Charge for (10-15) hours before first use.
2. Use a suitable charger to charge the battery, otherwise it will cause damage to the whole vehicle.
3. The car can be charged when the speed is slower than normal, otherwise the service life of the battery will be reduced.
4. When the car needs to be stored, the battery must be fully charged and then replenished every 30 days to ensure the normal use of the battery, otherwise the battery will not be charged.
