Charger	Input:220V/110V Output:DC12v1000MA

CHARGING PRECAUTIONS

Battery polarity cannot be reversed, please ensure the red wire is connected to the red battery terminal and the black wire is connected to the black battery terminal

Press the power switch to OFF position to turn the power off. Open the seat, connect the battery plug, red to red. Never drain battery completely or to a crawling speed, recharge the battery when a decrease in speed and power is noticed. Warranty will be voided if misuse has occurred. Battery charging must be done by adults only. Never allow children to charge the battery. A child could be injured by the electricity involved in charging the battery. Please don't connect the wires to a short circuit. The charger and the battery are not a toy. Do not allow children to play with the charger and the battery. Only operate the battery and charger specified according to the manual instructions. Please do not open the battery and the charger. To maintain safety of vehicle, always secure the battery with the bracket.

The battery must be handled and operated by adults only: the battery is heavy and contains sulfuric acid (electrolyte). Dropping the battery could result in serious injury. Before charging the battery check for wear or damage to the battery, charger, the connectors and other parts. If any damage found, the charger should be repaired or replaced immediately. Do not use a damaged charger.

It is normal for the adaptor to feel warm during charging, but if the charger feels too hot, stop charging immediately and check the battery and adaptor. When charging please turn off the power switch. Please charge the battery for 8-10 hours after first use. Subsequent charges should be 6-8 hours but not exceeding 10 hours. If do not use the car for a long time, please charge at least once a month to keep the battery cells active.

1. Plug the charger into the charging socket.

2. Plug the other end of the charger into your wall socket.

Batteries are perishable items that are subject to under and over charging. Please observe the charging time.

TROUBLESHOOTING

Problem: The car will not move

Answer 1: The battery is low, please charge for 6-8 hours but not exceeding 10 hours.

Charge at least once a month to keep the battery cells active.

Answer 2: The battery is low. Please charge the battery for 6-8 hours but not exceeding 10 hours.

Charge at least once a month to keep battery cells active.

To avoid short fuse or power cut off:

1. Do not overload the product. Max load is 35Kg.
2. Do not drag any item behind this product.
3. Do not allow water or any liquid into electric parts.
4. Do not change wire system without a professional.

TROUBLESHOOTING

Problem: The car only runs for a short time

Answer 1: The battery is low, please charge for 6-8 hours but not exceeding 10 hours.

Charge at least once a month to keep the battery cells active.
